ABOUT

I am a third year computer science student who is passionate about coding and developing websites. I am a person who is more into the interface of the product more than the actual mechanism which powers the backend. I had an interest in ui designing area since the beginning, when I was young I was more into art which paved the way for me to be better in the UI area. I always am a hardworking person who is resilient in his endeavors and consistent throughout the journey of any process.

EDUCATION

National Public school, gopalapuram, chennai

HSE-(CBSE-86%) SSLC-(CBSE-85%)

Loyola Icam college of engineering and technology, chennai

B. E in computer science and engineering(ongoing)(CGPA: 8.2)

TECHNICAL COMPETENCIES

Programming Languages: python, Java

Frameworks, libraries & Tools:

React, MongoDB, express.js, Node.js, HTML, CSS, Bootstrap, MySQL

TECHNICAL COMPETENCIES

ICAM SUMMER PROGRAM-FRANCE (NANTES) - Completed a one-month internship in France, gaining exposure to French culture, learning new technologies, improving French language skills, and successfully developing a project.

CERTIFICATIONS & ACHIEVEMENTS:

- Built a wind turbine as a project during my one-month stay in the ICAM Summer Program, **Nantes, France** which was considered the best built wind turbine.
- Completed a course in Python Full Stack Development at BTree Systems in **2023** before joining college for a period of 4 months.
- Completed a virtual internship in Artificial Intelligence at AcmeGrade from **January to March 2025**.
- Won 2nd and 1st price in code character and attack on robots in NIT Pragyan 2024.

Projects

- <https://hariram-portfolio-ctl.netlify.app/> - My own professional portfolio where the theme is inspired from a game.
- <https://hari-ramsss.github.io/stillpoint/> - A project built for **codesprouts hackathon** and it is a game based website **StillPoint** is an immersive, interactive fantasy web experience that transports users into the mystical world of Aethel.
- https://github.com/hari-ramsss/word_guess-react_game- - A project which I build for learning the fundamentals of react and I personally liked the process of creating this app where I had to think critically for certain states which should be existing or not.
- <https://github.com/hari-ramsss/couponmarch-> - A project which I made for the mnee hackathon it is a decentralized marketplace DApp for buying/selling vouchers and coupons securely using AI-powered validation and blockchain escrow.
